

UNIVERSITY OF EASTERN AFRICA, BARATON

P.O BOX 2500-30100 ELDORET, KENYA

SCHOOL OF BUSINESS

DEPARTMENT OF INFORMATION SYSTEM AND COMPUTING

25<sup>th</sup> March, 2025

Dear Sir/Madam,

**RE: ATTACHMENT FOR HARRISON ONYANGO ALOO ID. NO SALOHA2211**

As you well know, employment opportunities are increasingly becoming scarce and highly competitive. While this problem has various causes, it could be attributed to the fact that today many tertiary institutions graduate students with little practical knowledge. To better equip the graduates, the department of Information Systems and Computing has made it mandatory for all IT majors to undergo a twelve weeks attachment program as part of their degree requirements. The students are supposed to undertake their attachment during the last year of their studies.

Many organizations that have realized the responsibility of making university education relevant have agreed to participate in our humble effort. Therefore, we will be grateful if your esteemed organization takes the above-named student as an attachee pursuing a **Bachelor of Science in Software Engineering**.

We are optimistic that the sense of responsibility and seriousness of education that we have attempted to inculcate in our students will be manifested as he works with you. It is our sincere hope that this program as a whole will generate lasting relationships between the intern and the organization, the university and the organization that could open the doors for employment opportunities after graduation, and future interns.

Thanking you for your cooperation.

Sincerely,

Mr. Jefferson Mwakio Mwatati

Industrial Attachment Coordinator
